

TimeSimplicity®

Time management for dynamic, multishift, requirements-based, advanced scheduling

TimeSimplicity simplifies creation and management of complex schedules while accommodating employee preferences, required skills, labor law constraints and much more.

Save Time and Money!

Free Up Managers

Eliminate routine and manual scheduling activities while freeing supervisors to manage the business and focus strategically. Schedules are easily created and repeatable taking into account job requirements, employee availability and eligibility.

Give Employees Control

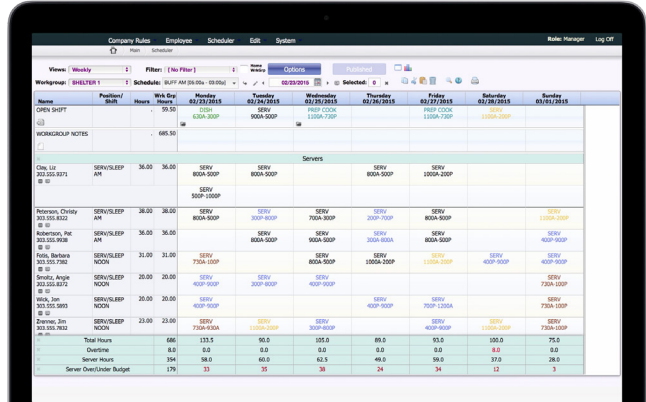

Self-serve schedule access and shift trade boards give employees flexibility to trade or pick up shifts. Employees access schedules through web-based portals or mobile apps.

Comply With Labor Regulations

Scheduling rules ensure shift constraints for required skills or maximum hour constraints are met. Available reports verify compliance and assist with internal and external audits.

Save Labor and Overtime Costs

Eliminate excessive overtime and compare budgeted hours to actual worked time.

The screenshot displays the TimeSimplicity software interface. At the top, there are menu options: Company Rules, Employee, Scheduler, Edit, System, Rate Manager, and Log Off. Below the menu, there are tabs for Views (Weekly, Daily, etc.), Filters (No Filter), and Options. The main area shows a grid with columns for dates from 03/23/2015 to 03/29/2015. The rows list employees and their assigned shifts, such as 'CINA SHIPT', 'MORGAN GROUP NOTES', 'Chia Liu', 'Morgan, Christy', 'Morgan, Nat', 'Hill, Barbara', 'Smith, Angie', 'Hill, Jan', 'Dunham, Jan', and 'Dunham, Matt'. The grid cells contain shift codes like 'SERV 800A-900P' and 'SERV 900A-1000P'. At the bottom of the grid, there is a summary table with columns for Total Hours, Overtime, Server Hours, and Server Over/Under Budget.

	Total Hours	Overtime	Server Hours	Server Over/Under Budget
Total Hours	666	135.5	60.0	105.0
Overtime	8.0	8.0	0.0	0.0
Server Hours	354	94.0	60.0	49.0
Server Over/Under Budget	179	35	35	24

Everything for Scheduling

Schedule Planning — Create schedule for date, time or location and apply to individuals or groups. Repeat or customize for future schedules with draft versions for planning.

Schedule Changes — Create open shifts for signup. See immediate availability lists with best fit criteria such as skills, availability, proximity, seniority and compliance restraints. See current and scheduled coverage.

Notifications — New schedule and shift change alerts vial email or text with different levels of alert based on manager level.

Schedule Enforcement — Warn or lock-out based on customizable thresholds and messages for early punching.

Employee Self-service — Employees see schedules, get reminders and have access to shift trade boards as well as time cards, timeoff requests and PTO balances.
